

## Oxidation Resistant and Decarburization Coatings

### Formulated to Protect:

- Tool Steels
- Zirconium Alloys
- Stainless Steels
- Titanium Alloys
- Nickel Alloys
- Molybdenum
- Carbon and Low Alloys
- Graphite

## High-Temperature Glass Protective and Lubricating Precoats

- ATP provides glasses in many different mesh sizes and temperature ranges
- ATP extrusion glasses provide superior protection and lubrication during hot extrusion processes
- For carbon steel, stainless steel, nickel alloys and exotic metals

## ATP Advantages

Easy-to-Apply

Environmentally Friendly

Custom Formulated

Fairly-Priced

High-Temperature Protection & Lubrication

Identification of Metals & Other Substrates

Traceability of Metals & Other Substrates

Serves a Variety of Industries
