Oxidation Resistant and Decarburization Coatings

Formulated to Protect:

- Tool Steels
- Zirconium Alloys
- Stainless Steels
- Titanium Alloys
- Nickel Alloys
- Molybdenum
- Carbon and Low Alloys
- Graphite

High-Temperature Glass Protective and Lubricating Precoats

- ATP provides glasses in many different mesh sizes and temperature ranges
- ATP extrusion glasses provide superior protection and lubrication during hot extrusion processes
- For carbon steel, stainless steel, nickel alloys and exotic metals

ATP Advantages

- Easy-to-Apply
- Environmentally Friendly
- Custom Formulated
- Fairly-Priced
- High-Temperature Protection & Lubtication
- Identification of Metals & Other Substrates
- Traceablity of Metals & Other Substrates
- Serves a Variety of Industries
